

FRP, Fiberglass-Reinforced Plastic, is a composite material comprising from polymer matrix reinforced with fibers. Our engineers look for every possible way to satisfy even the most demanding customers. Therefore, this year we proudly announce this newly innovated complete line of fiberglass umbrellas.

## FRP Advantages

- *High Flexibility*
- *Corrosion Resistant*
- High Durability
- Light Weight - Nearly 80% less than steel
- Flame Retardant
- Electrically Non-Conducting
- Environmental Friendly
